**SAMSUNG BUSINESS COMMUNICATION SYSTEMS (BCS) IS LEADING THE WAY IN THE  
2 - 400 LINE SEGMENT OF THE U.S. KEY/HYBRID MARKET**

*InfoTrack for Enterprise Communications (IEC) 1Q data confirms Samsung BCS has moved into  
the number one position in category targeting small- to medium-sized businesses*

**RICHARDSON, Texas – June 25, 2009** – Samsung Business Communication Systems (BCS) ranks number one in market share for the 2 - 400 line segment of the U.S. key/hybrid category, according to new data from InfoTrack for Enterprise Communications (IEC). In catapulting to the top spot, Samsung BCS, which provides advanced, affordable solutions for small and medium-sized businesses (SMBs), saw a more than 16 percent increase in category line shipments from the 4Q of 2008 to 1Q of 2009. During the same period, the overall enterprise communications market declined 28 percent.

“In a challenging economic environment, where all businesses, especially small-to-medium sized ones, are closely watching their bottom lines, we remain dedicated to providing powerful, yet affordable telephony solutions,” says Doug Wonson, Vice President and General Manager, Samsung BCS. “This philosophy has spearheaded our success in meeting the needs of today’s small-to-medium sized business.”

Demonstrating this commitment, the company recently unveiled The Samsung Advantage program. Launched earlier this year, the new program broadens dealer relationships and increases small business accessibility to enterprise-level technology solutions and Samsung support. In 1Q 2009 Samsung BCS added over 200 dealers, hosted the 1<sup>st</sup> Annual Dealer Advantage meeting to encourage deeper collaboration, and increased the visibility of Samsung BCS solutions in the SMB space.

“The increase in market share, despite an overall market decline, demonstrates that our new channel strategy and focus on small and medium-sized business is beginning to gain traction,” added Wonson.
